

VF3

Mini Sliding Lifters are a new generation undercut release system. They offer innovative options for mould designers. Integrated Cam tracking system makes use of the part undercut itself to move forward supported by the spring underneath.

Up to 5mm deep undercuts can be released with relatively small stroke. A single ejection system can provide two stage ejection using this system.

Unique features

- ◆ Innovative system for undercut release
- ◆ Removes greater depth of undercut with a small stroke
- ◆ Works for both internal and external undercuts
- ◆ Precision positioning and movement
- ◆ Shaft position can be either fixed or adjustable
- ◆ Actuates from back of the ejector system. Refer to figure below.
- ◆ DLC coated insert provides smooth movement
- ◆ Easy to Install and maintain
